

2GRD Science Supplies (MoDG Syllabus)
Thank you Lauren Fuller and Amanda Mills!

I went through this list and put * by the things I would not hide in a box in my closet. However, I would totally gather the rest including buying doubles of household things like a thermometer. I'd be all putting salt in a baggie and bleach and vinegar in travel bottles. BUT, maybe y'all have a better handle on your household than I do...

Week 3

bleach
2 clear cups
food coloring

Week 4

table salt
saucepan*
stove*
black construction paper
plate*

Week 6 (TWICE, again Week 30)

Leaves
Paper
Peeled crayons

Week 8

Dig Kit

Week 11

bowl (large enough to submerge an orange)*
orange*

Week 12

White paper
Black paper
Two identical cups or jars
Two rubber bands (or tape)
Thermometer

Week 15

Cotton balls
Blue construction paper

Week 19

2 liter diet coke
mentos
funnel or tube

Week 20

Two beakers or slim glass jars
Paper or something to cover the beakers with as a lid
Steel wool
Vinegar
Thermometer

Week 22

Magnet kit

Week 28

Leafy plant*
Petroleum jelly

Week 32

Flower press kit

Not assigned but included in the book*:

2 small pots
Seeds (I'd do bean or radish)
Sand (½ cup is enough)
Soil (1 cup is enough)
Coffee grounds (½ cups is enough)

*I'd totally do this in lieu of the bleach experiment. Caswells (including grownups) aren't certified for bleach. We haven't allowed it in the house in a decade. Plenty of other dangerous chemicals are, but bleach gets EVERYWHERE and it's a mystery.
